

Water/ Wastewater Department

The Water/Wastewater Department is responsible for supplying water and wastewater services to its customers. We presently have over 1000 water service connections. The City is permitted to pump up to 23 million gallons of water every day. The City is contracted to provide the Port of Morrow industries with 648 million gallons of water annually and is capable of providing even more.

Other Functions:

- Meter Reading
- [Back-flow/Cross-Connection Record Keeping](#)
- Water/Wastewater Connection Maintenance
- New Service Installs
- Repair and Replacement of water mains, service lines, and water meters
- Operate and maintain three 14-acre wastewater lagoons
- Operate and maintain an irrigation pump station for disposal of treated effluent wastewater from lagoons to a 104-acre circle
