| B. Anticipated Year in Which Indebtedness Will Be Retired .....                                    | 18        |
| C. Statement of Fiscal Impact on Other Jurisdictions .....   | 19        |

# I. INTRODUCTION

The City of Boardman West Boardman Urban Renewal Report accompanies the West Boardman Urban Renewal Plan and has been prepared to provide background information on the Plan to the Urban Renewal Agency, the City of Boardman Planning Commission and City Council, and the citizens of the community. The report has been prepared to comply with State law regarding Urban Renewal (ORS 457.085). It is intended to be used in conjunction with the West Boardman Urban Renewal Plan.

# II. DESCRIPTION OF EXISTING CONDITIONS

The following map presents the West Boardman Urban Renewal Area (“Area”) boundary. It is bordered roughly by SW Wilson Road to the south, Paul Smith Road to the west, and irregular undeveloped parcels to the north and east.

**FIGURE 2.1: WEST BOARDMAN URBAN RENEWAL AREA, BOARDMAN**

Source: Morrow County GIS, Johnson Reid LLC

The Agency currently administers one urban renewal area, located in the central city, to the east of the West Boardman Urban Renewal Area. Further references to the “Area” in this document refer to the West Boardman Urban Renewal Area unless otherwise stated.

## **A. Physical Conditions**

### **1. Description**

The Area contains 169.7 acres consisting of 166 individual parcels as well as public right of way. This represents 6.5% of the acreage within City limits. It is located on the western side of the city, south of the I-84 freeway.

The land had an assessed value of \$7,929,220 in the 2013/14 tax year, or 4.6% of the City’s total assessed value.

### **2. Topography**

The Urban Renewal Area is characterized by generally flat terrain and does not contain large scale changes in elevation. Some parcels are characterized by small rolling hills. The terrain is generally dry and is not in the flood plain.

### **3. Seismic Risk**

Seismic risk is an inherent risk in the Pacific Northwest including Boardman. There is potential risk to life and property due to seismic shaking and in some cases soft soil hazard. The northeastern corner of the state, while facing lower risk than the western and coastal areas of the state, still faces low to medium-low earthquake risk for earthquakes in the range of 1.0 to 4.0 magnitude, and lower risk for earthquakes in the 5.0 to 5.9 range.

The Area lacks the types of large older masonry buildings which are most at risk from seismic activity. Much of the land is undeveloped, while the rest of it features low-density housing.

### **4. Zoning**

The area is zoned for a mixture of residential, multi-family residential and manufactured home residential. 116.2 acres of the Area (68%) are zoned Residential. 18.0 acres are zoned Residential (Multifamily Sub District) (11%). 12.6 acres of the Area are zoned Residential (Manufactured Home Sub District) (7%). The remaining acreage is public right of way.

## 5. Building Stock and Land Use

The Area consists of a mixture of vacant parcels and generally low-density residential uses, of a variety of ages. These include single family detached homes and manufactured homes, and one attached multi-family property of 3.9 acres. An estimated 20% of the land is developed, while 80% is vacant.

## B. Social and Economic Conditions

The following section provides an overview of demographic and economic data in the City of Boardman.

Boardman is a community of roughly 3,235 people, and is the largest incorporated city in Morrow County. It has grown by an estimated 380 people since 2000. It now has an estimated 968 households. Figure 2.2 displays the past trends and estimated 2013 figures for population and income in Boardman.

**FIGURE 2.2: DEMOGRAPHICS AND INCOME CHARACTERISTICS  
CITY OF BOARDMAN**

| Average HH (\$)   | \$41,176        | \$49,877        | 1.9%               | \$52,830       | 1.9%               |
| Median HH (\$)  | \$32,055        | \$41,701        | 2.7%               | \$45,125       | 2.7%               |

Source: US Census, PSU Population Research Center, Johnson Reid LLC

- Since 2000, the City's population has grown by 13%, similar to the statewide growth rate. Over the same period Morrow County only grew by an estimated 3%. In fact, Boardman accounts for most of the County's growth over that time.

- Boardman experienced stable household sizes during this decade, in contrast to the state and regional trend of falling household size. This indicates that Boardman is attracting family households in greater proportion than some locales.
- An estimated 79% of Boardman’s households are family households, well in excess of the statewide average of 63%.
- Average income levels in Boardman are low compared to Morrow County as a whole. The per-capita income of \$16,100 is roughly 20% lower than the county average. However, the median household income is essentially equal to the County median. This indicates that households in Boardman have similar incomes, but larger household sizes in comparison to the County.
- Roughly 61% of households in Boardman are home owners, and 39% renters.

**Employment**

The following table presents employment estimates for Morrow County from the Oregon Employment Department. The table shows growth between 2001 and 2012. (The irregular time period is due to the limitations of this data set.) During this time, employment in Morrow County grew by an estimated 15% to almost 3,600 jobs, but the make-up of that employment has shifted over time. Some sectors experienced growth, while others experienced job losses. It is estimated that the city of Boardman houses nearly 1,000 jobs, or 28% of the countywide employment.

Manufacturing, Wholesale Trade and Education and Health Care sectors are estimated to have added the most jobs. Construction and NatAreal Resource sectors are estimated to have lost the most jobs.

**FIGURE 4.2: EMPLOYMENT BY INDUSTRY SECTOR, MORROW COUNTY**

| Industry Sector                            | EMPLOYMENT |       | CHANGE |      |        |
|--|------------|-------|--------|------|--------|

Source: Oregon Employment Department

### **C. Urban Renewal Area Qualifications**

ORS 457.420 specifies that the Area identified in the Plan along with any other urban renewal areas in the City may not exceed 25% of the City's land area or 25% of the City's assessed value.

The City of Boardman contains approximately 2,584 acres within its City limits. Based on the County Assessor's tax lot data, as well as estimates of public right of way, the total acreage in the Area boundary is 169.7 acres. Therefore, the area in the Area boundary represents 6.6% of the total acreage in Boardman. The existing Central Urban Renewal Area covers 6.3% of Boardman's acreage. The total between the two Areas is 12.8%, and is within the state law 25% acreage limitation for urban renewal areas.

As noted above, the total assessed valuation within an urban renewal area is limited to no more than 25% of the total municipal assessed value. A review of the Morrow County 2013/2014 Assessor's records indicates that the City of Boardman contained a total taxable assessed value (TAV) of \$171,132,296 for real property. The proposed Area comprises a total TAV of \$7,929,220. The resulting Area's share of City taxable assessed value is 4.6%. The TAV of the Central Urban Renewal Area is 1.9% of the city total. The combined TAV of the two Areas is 6.6% of Boardman's TAV. The Plan meets the state law requirement for relative size of the Plan and its assessed value.

### **D. Impacts on City Services and Costs**

The Plan establishes a framework for encouraging private development and redevelopment of land and rehabilitation of buildings within the Area. Service needs and costs are based on the land use designations contained in the Comprehensive Plan, and it is not anticipated that Urban Renewal activities will increase growth beyond what is already allowed for under current designations. Therefore, the Urban Renewal program is not expected to result in service demands or costs beyond what is already envisioned by the City under the current land use designations.

The impacts of the Tax Increment Financing (TIF) mechanism on the City of Boardman and other taxing jurisdictions are detailed in Section VII of this report.

### III. REASONS FOR SELECTION OF THE WEST URBAN RENEWAL AREA

The Boardman Urban Renewal Agency was created in 2008, with the goal to:

- Encourage private investment;
- Increase the taxable value of property in the City;
- Improve the utilization of land within specific areas of the community; and
- Eliminate blight and blighting influences.

The Area contains many large residential parcels which are good candidates for meeting the City's identified need for greater housing diversity. In addition, the Area includes a large city-owned surplus parcel which requires access improvements and potential land development in order to market this land for private use.

#### **ORS Requirements:**

In order to form an Urban Renewal Area, the City of Boardman must find that blighted areas exist within the Urban Renewal boundary. ORS 457.010 defines "blighted areas" and blighting conditions in the following manner.

#### **457.010 Definitions:**

As used in this chapter, unless the context requires otherwise:

(1) "Blighted areas" means areas which, by reason of deterioration, faulty planning, inadequate or improper facilities, deleterious land use or the existence of unsafe structures, or any combination of these factors, are detrimental to the safety, health or welfare of the community. A blighted area is characterized by the existence of one or more of the following conditions:

(a) The existence of buildings and structures, used or intended to be used for living, commercial industrial or other purposes, or any combination of those uses, which are unfit or unsafe to occupy for those purposes because of any one or a combination of the following conditions:

(A) Defective design and quality of physical construction;

(B) Faulty interior arrangement and exterior spacing;

(C) Overcrowding and a high density of population;

(D) Inadequate provision for ventilation, light, sanitation, open spaces and recreation facilities; or

(E) Obsolescence, deterioration, dilapidation, mixed character or shifting of uses.

(b) An economic dislocation, deterioration or disuse of property resulting from faulty planning;

- (c) The division or subdivision and sale of property or lots of irregular form and shape and inadequate size or dimensions for property usefulness and development;
- (d) The laying out of property or lots in disregard of contours, drainage and other physical characteristics of the terrain and surrounding conditions;
- (e) The existence of inadequate streets and other rights of way, open spaces and utilities;
- (f) The existence of property or lots or other areas which are subject to inundation by water;
- (g) A prevalence of depreciated values, impaired investments and social and economic maladjustments to such an extent that the capacity to pay taxes is reduced and tax receipts are inadequate for the cost of public services rendered;
- (h) A growing or total lack of proper utilization of areas, resulting in a stagnant and unproductive condition of land potentially useful and valuable for contributing to the public health, safety, and welfare; or
- (i) A loss of population & reduction of proper utilization of the area, resulting in its further services elsewhere.

**Blighting Conditions Within Preliminary Boundary:**

The feasibility study revealed the following conditions that constitute “blight” within the preliminary boundary:

**1. Inadequate Streets and Other Rights of Way [ORS 457.010 (1)(e)]**

The Area features large swaths of city and privately-owned land which are not served by adequate street connections. In some cases, this land is already subdivided into residential lots which are not served by street or utility. The area lacks adequate water and sewer service to serve full build-out. Given the economic conditions surrounding residential development in the community, the lack of this infrastructure presents a high barrier to this land being developed.

In particular, the northern portion of the Area lacks access from the central city, which is planned to eventually be remedied through an extension of Oregon Trail Boulevard which has lacked funding. In addition, the north/south roads into the area, Faler and Paul Smith Roads, are substandard and require paving, sewer and water improvements, sidewalks and curbs.

**2. Depreciated Values and Impaired Investments [ORS 457.010 (1)(g)]**

The Area is characterized by depreciating values since 2007, and impaired investments in the sense that current home prices and rents in the community do not support the development of infrastructure on large un-served parcels, including city-owned land, nor the extension of adequate water and sewer service to these parcels.

The city currently owns 14.2 acres of residential subdivision land within the proposed Area. This is roughly 8% of the acreage in the Area. It is in the public interest to facilitate the eventual sale and development of this land, both financially and in order to further Boardman's Comprehensive Plan goals and policies regarding encouraging new housing development in the city.

**3. Lack of Proper Utilization of Land [ORS 457.010 (1)(h)]**

Related to point #2 above, the study area is characterized by many large and vacant parcels which are likely to remain in disuse until they are served with infrastructure. Insofar as it is in the public interest and in agreement with City policies to encourage new development and new types of housing, this residentially-zoned land is not under proper utilization, and is likely to remain so given real estate development market dynamics in the community.

Based on the conditions found within the preliminary study area boundary, the Area contains one or more of the conditions listed under the definition of "blighted areas" found in ORS 457.010. Urban Renewal is an appropriate tool to create resources to address these conditions.

## IV. RELATIONSHIP BETWEEN PROJECTS TO BE UNDERTAKEN AND EXISTING CONDITIONS IN THE AREA

The following project categories are designed to address the existing conditions in the Area. These include:

| <u>Project</u>                           |
|--|
| 1 Extension of Oregon Trail Boulevard    |
| 2 Improvement of Faler Road              |
| 3 Extension of local connector street(s) |
| 4 Improvement of Wilson Road             |
| 5 Retirement and/or Senior Housing       |
| 6 Parks/ trails                          |
| 7 Strategy/subdivision of City Property  |
| 8 Administration                         |

The list above prioritizes physical improvements to significantly increase access and service infrastructure to the Area. These improvements are expected to increase the development potential of underutilized and difficult to develop properties, including publicly owned parcels, in order to meet the City's housing goals. The projects also include provision of parks and open space to serve these new households.

The Agency, or its approved designee, will be responsible for managing the projects and programs throughout the Area. Administrative costs reflect the added expense over the life of the Plan.

## V. RELOCATION REPORT

According to ORS 457.085 (3)(i) a relocation report shall include:

- (A) An Analysis of existing residents or businesses required to relocate permanently or temporarily as a result of agency actions under ORS 457.170;
- (B) A description of the methods to be used for the temporary or permanent relocation of persons living in, and businesses situated in, the Urban Renewal Area in accordance with ORS 35.500 to 35.530; and
- (C) An enumeration, by cost range, of the existing housing units in the Urban Renewal Areas of the plan to be destroyed or altered and new units to be added.

**No relocation of existing residences or businesses is planned for the Area.** Therefore, no relocation report is included in this Report.

## VI. PROJECT COSTS & TIMING

The Report accompanying the Plan must identify anticipated projects including estimated cost and timeline for completion. Proposed Urban Renewal projects are described below. The project totals reflect a conservative use of the projected amount of revenue over the life of the Plan (see following section).

The following is a description of each of the possible projects, with estimated budget (in 2013 dollars) and completion date:

### **1. Extension of Oregon Trail Boulevard w/ Infrastructure**

Construction and improvement of the planned Oregon Trail Boulevard alignment from S Main Street to the east to SW Faler Road to the west to increase access and improve service to the Area. The westernmost 2,640 feet (estimated) of this planned street lies within the West Boardman Urban Renewal Area. (The eastern portion of an estimated 1,250 lies within the Central Urban Renewal Area.) Improvement might include new street construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right of way to improve functionality, multi-modal access, marking, parking or aesthetics. Construction may include the construction of all underground and/or above ground utilities to accompany the new street. Construction of this street might also entail the acquisition of private property for use as public right of way.

Estimated Tax Increment Allocation: \$1,500,000

Estimated Time of Completion: 2024

### **2. Improvements to SW Faler Road**

Improvements to SW Faler Road to improve functionality and improve service to the Area. Improvement might include new street construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right of way to improve functionality, multi-modal access, marking, parking or aesthetics. Improvement may include the construction or improvement of all underground and/or above ground utilities in or along the right of way. Improvement of this street might also entail the acquisition of private property for use as public right of way.

Estimated Tax Increment Allocation: \$800,000

Estimated Time of Completion: 2034

### **3. Extension of One or More Local Connector Streets**

Construction and improvement of one or more local streets running through the Area in order to complete the internal street system. Improvement might include new street construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right of way to improve functionality, multi-modal access, marking, parking or aesthetics. Construction may include the construction of all underground and/or above ground utilities to accompany the new street. Construction of this street might also entail the acquisition of private property for use as public right of way. While included as a potential project in the Plan, the construction or extension of local streets may also be completed wholly by or in partnership with, private entities, as condition for development.

Estimated Tax Increment Allocation: \$800,000

Estimated Time of Completion: 2034

### **4. Improvements to SW Wilson Road**

Improvements to SW Wilson Road to improve functionality and improve service to the Area. Improvement might include new street construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right of way to improve functionality, multi-modal access, marking, parking or aesthetics. Improvement may include the construction or improvement of all underground and/or above ground utilities in or along the right of way. Improvement of this street might also entail the acquisition of private property for use as public right of way.

Estimated Tax Increment Allocation: \$300,000

Estimated Time of Completion: 2034

### **5. Retirement and/or Senior Housing**

Fund senior housing within the Area through Agency action or partnership with private entities. Funds may be used for site acquisition and disposition, subsidizing or financing development through loans, grants or any other financing mechanism allowed to an urban renewal agency under state law. The senior housing funded may be affordable or market rate.

Estimated Tax Increment Allocation: \$250,000

Estimated Time of Completion: 2034

### **6. Parks and Trails**

Provide parks, trails and/or other open space as necessary to serve households in the Area. This may include acquisition of lands for parks or rights of way, soft and hard costs of construction of all park, trail and other open space improvements including landscaping, paving, play

equipment, lighting, seating, planters, fencing, restrooms, shelters, tables and other appropriate improvements.

Estimated Tax Increment Allocation: \$250,000

Estimated Time of Completion: 2034

### **7. Strategy for Subdivision and/or Disposition of Public Lands**

Create a strategy for marketing and disposition of public lands within the Area which the City may seek to return to private ownership in order to increase tax base and meet the City's housing goals. Such a strategy might include feasibility analysis, development opportunity study, recommendations on preparatory work, marketing and negotiation with potential buyer/developers. It might also include the expenses of legally subdividing City-owned property.

Estimated Tax Increment Allocation: \$50,000

Estimated Time of Completion: 2024

### **8. Administrative Costs**

This project includes funding for administration of the Area's projects. Administration includes project management, regulatory compliance, and consultant and legal expenses.

Estimated Tax Increment Allocation: \$500,000 (\$25,000 per year)

Estimated Time of Completion: 2034

**FIGURE 6.1: SUMMARY OF ESTIMATED PROJECT COSTS**

| <u>Project</u>                           | <u>Cost</u>        | <u>Share</u> |
|--|--------------------|--------------|
| 1 Extension of Oregon Trail Boulevard    | \$1,500,000        | 34%          |

## VII. FINANCIAL ANALYSIS OF THE PLAN

### A. Anticipated Tax Increment Revenues

The following table presents the estimated projection of Tax Increment Financing (TIF) revenues to the Agency over the 20-year period beginning tax year 2013/14 and ending tax year 2033/34.

At the time of approval, the Assessed Value of all the property in the Area will be determined by the County Tax Assessor in a "Certified Statement," commonly called the "Frozen Value." The Frozen Value of the Area is an estimated \$7,929,220. Property Taxes imposed by all the taxing entities on this Frozen Value continue to flow to those respective taxing entities. An increase in the Assessed Value of all the property in the Area from year-to-year is called the "Incremental Value" and most of the property taxes that would be levied on this Incremental Value is segregated and flow to the Agency as "Tax Increment Revenue."

The Increment Value is composed of two elements: the annual statutory 3% increase in assessed value (not to exceed Real Market Value-RMV) and the assessed value of new construction. The Increment Value times the "Consolidated Rate" of taxation equals the Tax Increment Revenue.

The Consolidated Rate includes most of the property taxes levied by all the taxing entities that levy taxes on property in the Area. This includes each entities "permanent tax rates" plus the rate of tax imposed by some entities to retire bonds issued prior to October 6, 2001. The Consolidated Rate will vary somewhat from year-to-year, for reasons which are hard to forecast and may include unforeseen events. Therefore, these projections are based on the 2013-14 Consolidated Rate of \$19.4561/\$1,000 throughout the 20-year life of the Plan.

Figure 7.1 shows the Frozen Base, the assumed growth in the Increment Value, and the Tax Increment Revenue that would flow to the Agency at the Consolidated Rate. Tax Increment Revenue can be used to pay principle and interest on debt, usually in the form of Tax Increment Bonds, so the final column in Figure 7.1 shows the Bonding Capacity of the Area.

The actual timing and amount of Bonds or other debt the Agency may issue depends entirely upon the timing and amount of growth in the Incremental Value of the Area.

Source: Morrow County, Johnson Reid LLC

<sup>1</sup> This estimate of bonding capacity is based on the most current data from the Morrow County Tax Assessor for the taxlots included in the West Boardman Urban Renewal Area. The frozen base is not official until certified by the Assessor after adoption of the Plan.

<sup>2</sup> Represents estimated bonding capacity per year, assuming that debt will be paid off by end of Project Period. Assumes a 6%, 20-year bond, with debt-coverage ratio of 1.25. Any and all of these assumptions may change at time of financing, which will change the estimated figures shown here.

## **B. Anticipated Year in Which Indebtedness Will Be Retired**

According to the above projections, subject to all assumptions, all Tax Increment Revenues will be collected by the 20<sup>th</sup> year of the Plan (2033-34). Based on the growth projections above, total Tax Increment Revenues will be \$5,116,343, sufficient to finance the total list of projects costing \$4,450,000.

The Agency may issue Bonds or otherwise incur debt whenever and in whatever amount Tax Increment Revenue is adequate to repay such Bonds or other debt. However, the Agency may not issue Bonds or other debt at any time which would require repayment with Tax Increment Revenue collected after the end of the Project Period (2033-34).

### C. Statement of Fiscal Impact on Other Jurisdictions

Tax Increment financing creates a fiscal impact on all taxing entities that levy property taxes within the Area. These “overlapping districts” forego taxes on the Incremental Value for the 20 years the Tax Increment Revenue is collected by the Agency. The impact on each entity varies with the share it has in the Consolidated Rate and the share of its total assessed value lies within the Area.

Figure 7.2, shows the share each taxing entity has in the Consolidated Rate and the amount of tax it will forego over the 20-year life of the Area.

**FIGURE 7.2 FORECAST OF TOTAL TAX REVENUE FORGONE OVER 20 YEARS OF TAX INCREMENT FINANCING**

| Taxing Jurisdiction             | Divisible Tax Rate (per 1,000) | % of Total Consolidated Rate | Tax Foregone (over 20-Year life of Area) | Average Annual Impact |

Source: City of Boardman, Morrow County, Johnson Reid LLC

As a percentage of its own tax levy, the City of Boardman, the Boardman Park District and the Boardman Cemetery District are the largest contributors to the Area's Tax Increment financing at 3.72%, 2.13% and 2.13% percent. In dollar amounts, Morrow County Schools (\$1,437,700), the City of Boardman (\$1,433,400) and Morrow County (\$1,087,100) are the three largest contributors.

As a group, all taxing entities in the overlapping district category will forego an estimated maximum of \$5,116,600 at the current consolidated rate of \$19.4561/\$1,000 during the 20-year life of the Area.

Thereafter, these taxing entities will receive taxes levied on the projected \$28,397,295 Incremental Value (as of 2034). Moreover it is anticipated the Incremental Value will continue to grow into the future but at a slower rate. Figure 7.4 shows the period of time needed to fully recover of taxes foregone between 2013-14 and 2033-34. This projection assumes that following the end of the Plan period that assessed value will grow at the statutorily allowed rate of 3% per year.

**FIGURE 7.4 RECOVERY OF TAXES FOREGONE DURING 20 YEARS OF TAX INCREMENT FINANCING  
BEGINNING IN 2034-35 TAX YEAR**

| <b>Tax Year</b> | <b>Est. Incremental Value</b> | <b>Taxes Recovered</b> | <b>Total Taxes Foregone</b> |

Source: Johnson Reid LLC

While the Recovery period show above is the maximum Tax Increment Revenue generated by the growth in the Incremental Value based on the assumptions of this Report, even if the growth rate and timing are different, either more or less than assumed, the taxing entities will recover all taxes foregone over 20 years in the nine years following 2033-34.

**Urban Renewal Area Map**  
**Appendix 1 – Legal Description**

# **I. INTRODUCTION**

The City of Boardman has recently completed a feasibility study for establishing an Urban Renewal Area on the City’s western side. The following Urban Renewal Plan (the Plan) and accompanying Report have been prepared to implement the desires of the community to establish the West Boardman Urban Renewal Area (Area). The boundaries of the Area illustrated in Figure 1 (Section II) was selected to achieve the following purpose.

## **A. Statement of Purpose**

This Plan has been prepared to establish an Urban Renewal Area within the City. The purpose of the Plan is to:

- Revitalize the West Boardman Urban Renewal Area, by alleviating conditions of blight and underinvestment;
- Create public improvements including street improvements;
- Encourage new public and private investment;
- Increase the taxable value of property in the City; and
- Improve the utilization of land within specific areas of the community.

The Plan is designed to be consistent with the Comprehensive Plan and Zoning Regulations adopted by the Boardman City Council. The Plan is intended to guide the provision of public facilities and activities necessary for the orderly and proper improvement and redevelopment of the Area. Through implementation of the Plan, economic development will be stimulated by the elimination of blighting conditions, provision of supporting public facilities, and general improvements in the overall appearance, condition, and function of the Area in its entirety.

The Plan presented in this document meets the requirements of Chapter 457, Oregon Revised Statutes. The Plan also complies with other state and local laws pertaining to Urban Renewal plans.

## **B. Goals and Objectives**

The following Goals and Objectives are envisioned for improving the economic health, residential character, transportation functioning, and aesthetic appearance of the Area.

**Goal 1: Provide opportunities for public participation in the preparation and adoption of Urban Renewal plans, plan amendments and policies.**

**Goal 2: Adopt a prudent annual budget to minimize financial risk to the Urban Renewal Agency and the City of Boardman.**

Objective 2.1: Establish Urban Renewal Agency policies to guide strategic financial investments in the Area based on public benefit, documented financial need, scale of the project and accepted underwriting principles.

Objective 2.2: Evaluate tax increment revenue collections annually to minimize long term impacts to overlapping taxing districts.

Objective 2.3: Secure grant funding from regional, state, federal agencies, and private organizations to implement the Plan and supplement tax increment revenue.

**Goal 3: Encourage private investment, development and redevelopment within the Area.**

**Goal 4: Promote a diversity of housing types and price levels to meet the needs of the entire Boardman community through strategic Urban Renewal investments.**

**Goal 5: Facilitate the disposition and reuse of publically owned lands in the Area.**

## **C. Plan Administration**

The Plan consists of the text and exhibits contained in this document and the attached Report. The Plan applies to the specific area outlined in Exhibit 1 and further described in Section II. The Boardman Urban Renewal Agency shall administer the Plan in accordance with ORS Chapter 457, the Oregon Constitution, and all other applicable laws and ordinances, whether or not specifically referenced in this document.

#### D. Plan Duration

The Plan projects will be completed in twenty years from the date the Plan becomes effective after approval by the City Council (Project Period). The Plan allows the Agency to issue debt to be repaid with Tax Increment Financing (TIF) revenue up to the end of the Project Period. At no time during the Project Period will the Agency issue debt which would require repayment using TIF revenue collected after the end of the Project Period. If the projects in this Plan, and any additional projects added to the Plan, are completed earlier, and all indebtedness is paid, the Urban Renewal Agency and the City Council may take action to terminate the Plan at that time.

#### E. Definitions

1. **Agency** means the Urban Renewal Agency of the City of Boardman.
2. **Area** means the West Boardman Urban Renewal Area.
3. **Blighted Areas** are areas which, by reason of deterioration, faulty planning, inadequate or improper facilities, deleterious land use or the existence of unsafe structures, or any combination of these factors, are detrimental to the health, safety or welfare of the community. **Blight** shall have the same meaning in this Plan as defined in ORS 457.010.
4. **Boundary** means the geographic and legal limits which encompass the Area.
5. **City** means the City of Boardman Oregon.
6. **City Council** means the Boardman City Council.
7. **County** means Morrow County, Oregon.
8. **Lot** means a unit of land that is created by a subdivision or platting of land and recorded in the land records of Morrow County
9. **Public Improvement Plan** means drawings, development standards and/or objectives designed to guide the improvement of public facilities and services in the Area.

10. **ORS** means the Oregon Revised Statutes.
11. **Persons** means any individual, family, business, firm association, or corporate entity.
12. **Plan** means this West Boardman Urban Renewal Plan consisting of the text and accompanying exhibits.
13. **Project or Activity** means any work or undertaking carried out under ORS 457.170 in an Area and specifically the development or improvement projects described in Section III of this Plan.
14. **Property Owner** means any person who owns property within the Boardman Area.
15. **Report** means the report accompanying this Plan prepared pursuant to ORS 457.085(3).
15. **State** means the State of Oregon.
16. **Text** means the Plan text.

## II. GENERAL DESCRIPTION OF WEST BOARDMAN URBAN RENEWAL AREA

### A. Boundary

The Area includes land within the City of Boardman, only. A legal description is included in Appendix 1.

The Area encompasses 166 tax lots and a total of 169.7 acres including existing public street rights of way.

The Area is an irregularly-shaped area located on the western side of the city, south of the I-84 freeway. It is bordered roughly by SW Wilson Road to the south, Paul Smith Road to the west, and irregular undeveloped parcels to the north and east.

FIGURE 1: WEST BOARDMAN URBAN RENEWAL AREA

Source: Morrow County GIS, Johnson Reid LLC

## B. Land Use, Zoning, Development Standards

The Land Use Plan for the Area is based on the City of Boardman Comprehensive Plan Map and Zoning Map. (See Figure 2). The proposed land uses, maximum densities and building requirements within the Area are consistent with the City's Zoning Maps.

**FIGURE 2: ZONING MAP, WEST BOARDMAN URBAN RENEWAL AREA**

Source: Morrow County GIS, City of Boardman

The use and development of the land within the Area shall be governed by the City of Boardman Comprehensive Plan and Municipal Code. No changes to zoning or zoning standards are anticipated as part of the Plan, or in response to its approval.

The following text provides a brief overview of the included zones and their purpose. The source for complete details on zoning designations within the City and Area shall be the Boardman Development Code, Chapter 2.1.

The land within the Area boundary is covered by three different zoning designations. The Army Corp of Engineers land does not have a designated zone on the City zoning map. The purpose of each zone and a summary of the existing development standards follows:

**1. Residential District (R)**

The Residential District is the City’s base residential zone. The purpose of the Residential District is to promote the livability, stability and improvement of the City of Boardman’s neighborhoods, including to make efficient use of land and public services, accommodate a range of housing needs, and reduce the reliance on the automobile for travel. This zone is designed primarily for single-family detached housing. Buildings are generally restricted to 35 feet in height, and a 15-foot setback from the street, and 6 to 7 feet for non-street lot lines.

**2. Residential: Multi-Family Sub District (MF)**

The Multi Family Sub District is designed to provide land for larger multiple family housing developments. Multi-Family Housing is housing that provides 4 or more dwellings on an individual lot. Buildings are generally restricted to 30 feet or 3 stories in height, and 20% of the site is required to be usable common space, including setbacks.

**3. Residential: Manufactured Home Sub District (MF)**

This zone allows single-family dwellings as permitted in the general Residential District, as well as manufactured home parks on sites of 1 acre or larger. Within the park, manufactured homes must be on lots of at least 2,500 square feet, and 30 feet wide by 40 feet long. Dwellings must be set back 15 feet from public right of way, and at least 10 feet between dwellings.

**C. Relationship to Local Objectives**

The Plan is supportive of the public goals and objectives of the City of Boardman and supports the general community vision for the Area. The primary source of public policy addressed by this Plan is the City’s Comprehensive Plan, as described below:

**Comprehensive Plan Policies**

This Plan is supportive of the City of Boardman Comprehensive Plan, addressing the following adopted policies:

**CHAPTER 1: CITIZEN INVOLVEMENT**

- The City shall strive to provide for widespread citizen involvement, especially in its land use planning process.
- The City shall strive to assure effective two-way communication with its citizens.
- The City shall endeavor to provide technical information in an available and understandable form.

## CHAPTER 2: LAND USE PLANNING POLICIES

2. The City encourages the development of infill and redevelopment of existing land in order to balance the need to expand the Urban Growth Boundary (UGB)

## CHAPTER 10: HOUSING

1. The City shall provide a variety of living environments to meet regional housing needs for those of different family size and income.
3. Encourage new development concepts to meet changing housing demands and to provide self-contained recreation facilities.
5. Encourage planned unit developments while maintaining an overall low-density profile by incorporation of more open space in the development.
7. Provide infill opportunities for attached rowhouse development, duplex and triplex development in residential neighborhoods.
8. The City shall promote where possible, the evolution of safe and aesthetically pleasing residential neighborhoods that are efficiently integrated with business and commercial property, schools, parks, public facilities and other urban development.
11. The City shall encourage residential development within the city limits in areas which are appropriate for urban development.

## CHAPTER 11: PUBLIC FACILITIES

1. The City shall assure urban services (water, sewer, and storm drainage services and transportation infrastructure) to residential, commercial and industrial lands within the City's Urban Growth Area as these lands are urbanized.
2. To minimize the cost of providing public services and infrastructure, the City shall discourage inefficient development without adequate public services and promote efficient use of urban and urbanizable land within the City's urban growth boundary, including requiring all urban development to be serviced by full urban services.
6. The City shall prioritize development of land serviced by utilities and require the extension of water, sewer and storm drainage facilities for all urban level development within the UGB.
11. The City shall establish and maintain a range of funding mechanisms for building new water, sewer, storm drainage and transportation infrastructure and maintaining existing infrastructure.

## CHAPTER 12: TRANSPORTATION

1. The Transportation System Plan is an element of the Boardman Comprehensive Plan (as a Technical Appendix).

[The adopted TSP and Proposed Transportation Connectivity Map include proposed improvements within the Area, including the extension of Oregon Trail Boulevard.]

## CHAPTER 14: URBANIZATION

2. To manage growth so that urban areas are developed when urban services (water and sewer) are available.
3. Avoid sprawl and leap-frog development by encouraging infill and compact redevelopment in appropriate areas of the city.

### **Boardman Urban Renewal Goals**

This Plan is supportive of the following stated goals of the Boardman Urban Renewal Agency:

- Encourage private investment;
- Increase the taxable value of property in the City;
- Improve the utilization of land within specific areas of the community; and
- Eliminate blight and blighting influences.

The goals listed above support the creation of the Area and this Plan. The Plan shall facilitate the extension of public services, orderly urbanization of the land, development of diverse housing types, and private investment.

### **III. OUTLINE OF PROJECTS & REDEVELOPMENT ACTIVITIES**

#### **A. General Redevelopment Outline**

The City of Boardman has activated an urban renewal agency and the Agency has prepared this Plan. The Area is focused on the west side of the City, south of the I84 freeway. Urban Renewal has been an effective tool for stimulating public and private investment in areas in need of revitalization throughout Oregon. The most effective urban renewal plans are focused with clearly defined goals, objectives and project outcomes.

The Plan outlines a series of public realm investments including transportation, utilities, streetscape and other improvements.

The most substantial physical improvements planned are the construction of new public infrastructure, including streets and utilities. One or more projects may call for the acquisition of properties in the Area to obtain public right of way, but there is no anticipated demolition or relocation of households or businesses.

The following is a description of each of the possible projects.

#### **B. Urban Renewal Projects**

##### **1. Extension of Oregon Trail Boulevard w/ Infrastructure**

Construction and improvement of the planned Oregon Trail Boulevard alignment from S Main Street to the east to SW Faler Road to the west to increase access and improve service to the Area. The westernmost 2,640 feet (estimated) of this planned street lies within the West Boardman Urban Renewal Area. (The eastern portion of an estimated 1,250 lies within the Central Boardman Urban Renewal Area.) Improvement might include new road construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right of way to improve functionality, multi-modal access, marking, parking or aesthetics. Construction may include the construction of all underground and/or above ground utilities to accompany the new street. Construction of this street might also entail the acquisition of private property for use as public right of way.

##### **2. Improvements to SW Faler Road**

Improvements to SW Faler Road to improve functionality and improve service to the Area. Improvement might include new street construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right

of way to improve functionality, multi-modal access, marking, parking or aesthetics. Improvement may include the construction or improvement of all underground and/or above ground utilities in or along the right of way. Improvement of this street might also entail the acquisition of private property for use as public right of way.

### **3. Extension of One or More Local Connector Streets**

Construction and improvement of one or more local streets running through the Urban Renewal Area in order to complete the internal street system. Improvement might include new street construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right of way to improve functionality, multi-modal access, marking, parking or aesthetics. Construction may include the construction of all underground and/or above ground utilities to accompany the new street. Construction of this street might also entail the acquisition of private property for use as public right of way. While included as a potential project in the Plan, the construction or extension of local streets may also be completed wholly by or in partnership with, private entities, as condition for development.

### **4. Improvements to SW Wilson Road**

Improvements to SW Wilson Road to improve functionality and improve service to the Area. Improvement might include new street construction, widening, paving, brick or decorative paving, striping, bike lanes, sidewalks, curbs, plantings, or any other improvement to public right of way to improve functionality, multi-modal access, marking, parking or aesthetics. Improvement may include the construction or improvement of all underground and/or above ground utilities in or along the right of way. Improvement of this street might also entail the acquisition of private property for use as public right of way.

### **5. Retirement and/or Senior Housing**

Fund senior housing within the Area through Agency action or partnership with private entities. Funds may be used for site acquisition and disposition, subsidizing or financing development through loans, grants or any other financing mechanism allowed to an urban renewal agency under state law. The senior housing funded may be affordable or market rate.

### **6. Parks and Trails**

Provide parks, trails and/or other open space as necessary to serve households in the Area. This may include acquisition of lands for parks or rights of way, soft and hard costs of construction of all park, trail and other open space improvements including landscaping, paving, play equipment, lighting, seating, planters, fencing, restrooms, shelters, tables and other appropriate improvements.

## **7. Strategy for Subdivision and/or Disposition of Public Lands**

Create a strategy for marketing and disposition of public lands within the Area which the City may seek to return to private ownership in order to increase tax base and meet the City's housing goals. Such a strategy might include feasibility analysis, development opportunity study, recommendations on preparatory work, marketing and negotiation with potential buyer/developers. It might also include the expenses of legally subdividing City-owned property.

## **8. Administrative Costs**

This project includes funding for administration of the Urban Renewal program. Administration includes project management, regulatory compliance, and consultant and legal expenses.

## IV. PROPERTY ACQUISITION AND RELOCATION PLAN

In order to accomplish the extension of Oregon Trail Boulevard, it is anticipated that some private property may need to be acquired to accommodate public right of way. Such property would be retained for public use and might be purchased at any time during the 20-year life of the Plan. It is anticipated that all or some portion of the following parcels, located in the northern part of the Area may be subject to acquisition:

| <u>TAXID</u>   | <u>ACRES</u> |
|----------------|--------------|
| 04N2517-00100  | 39.4         |
| 04N2517A-00101 | 3.96         |
| 04N2517A-00102 | 5.59         |
| 04N2516B-00401 | 2.19         |

Prior to any acquisition of any other parcel, not identified here, the Agency shall have approved a Minor Amendment to the Plan to identify the real property to be acquired.

There are no anticipated relocation activities required by the projects as outlined in this Plan. If such necessity arises during the execution of this Plan, all relocation activities will be undertaken and payments made in accordance with the requirements specified in the ORS 35.500 et seq. Prior to any acquisition activity which may require displacement, the Agency will establish a Relocation Policy which will call for the Agency's assistance to those residents and businesses displaced. Such assistance may include providing information regarding suitable locations, payments of moving expenses and other reimbursements, as deemed necessary.

## **V. METHODS OF FINANCING**

### **A. General Description of Financing Methods**

The Agency may borrow money and accept advances, loans, grants and any other form of financial assistance from the federal government, the state, the county or other public body, or from any source, public or private, for the purposes of undertaking and carrying out the projects and intents of this Plan. This Plan also authorizes any other financing methods, public or private, allowed to an Urban Renewal Agency under ORS Chapter 457.

The primary anticipated source of funding for carrying out this Plan and its projects, in part or in whole, is Tax Increment Financing as authorized in Section 1c, Article IX of the Oregon Constitution and ORS Chapter 457. This Plan allows for a division of ad valorem taxes under ORS Chapter 457.420 to .470.

Revenues obtained by the Agency will be used to pay or repay costs, expenses, advancements and indebtedness incurred in planning or undertaking project activities or otherwise exercising any of the powers granted by ORS Chapter 457 in connection with the implementation of this Plan.

### **B. Maximum Indebtedness**

The limit on maximum indebtedness allowed to the Area by the calculation method described in ORS 457.190(4)(a) is \$50 million.

The maximum indebtedness as set in this Plan shall be \$5,000,000 which is below the maximum limit described above. This amount is the principal of such indebtedness and does not include interest or indebtedness incurred to refund or refinance existing indebtedness. This amount is based upon the cost of planned projects, plus contingency.

### **C. Prior Indebtedness**

Any indebtedness permitted by law and incurred by the City or the Urban Renewal Agency in connection with planning and preparation of this Plan may be repaid from tax increment revenues from the Area when and if such funds are available.

## VI. URBAN RENEWAL PLAN AMENDMENTS

The Plan anticipates the possibility of both substantial and minor amendments becoming necessary in response to future changes in economic conditions, land use, and other factors. In accordance with ORS 457.220, any substantial amendment to the Plan shall, before being carried out, be approved and recorded in the same manner as called for in the original plans adopted under the requirements of ORS 457.085.

For the purposes of the document, “substantial amendment” means:

- Adding land to the Area, except for an addition of land that totals not more than one (1) percent of the existing area of the Boardman Area.
- Increasing the maximum amount of indebtedness that can be issued or incurred under the Plan.
- Extending the Project Period (initially 20 years) of the Plan. This refers to the period in which new projects are initiated by the Agency. Debt service resulting from such projects or other authorized Agency activities which requires collection of Tax Increment revenue may not extend beyond the 20-year Project Period without an amendment.

All amendments or changes in this Plan which are not Substantial Amendments, as specified above, shall be considered Minor Amendments. Minor amendments to the Plan shall be approved by Resolution of the Agency.

Presentation of any amendment to the Urban Renewal Agency or City Council shall be accompanied by the recommendations of staff and/or an advisory group.

Any amendments to planned uses which result from amendment of the underlying Comprehensive Plan designations or Zoning District standards will be considered minor amendments to the Renewal Plan. They are designated minor because the City’s process for Zoning Code and Comprehensive Plan Map amendments requires analysis, public involvement and adoption by Ordinance in a Council public hearing.
